References

- [1] Thomas H. Cormen, Charles E. Leiserson, Ronald L. Rivest, and Clifford Stein. *Introduction to Algorithms, Third Edition*. MIT Press, 3rd edition, 2009.

This textbook is a foundational reference in algorithm design and analysis. Chapter 26 introduces flow networks and formally presents the max-flow min-cut theorem. The Ford–Fulkerson method and later improvements such as push–relabel algorithms are discussed, making this source essential for understanding classical and modern flow techniques.

In *Proceedings of the 2025 Conference on Research on Equitable and Sustained Participation in Engineering, Computing, and Technology*, RESPECT 2025, page 339–342, New York, NY, USA, 2025. Association for Computing Machinery.

This paper explores the challenges faced by low-income students in accessing AI literacy and the implications for educational equity.
