

Project Topic

Raelyn Brooks

February 10, 2026

1 Introduction

The introduction will broadly introduce your topic, motivate it, and describe what will be done.

2 Related Works

Discuss prior research and how your work builds on or differs from existing studies.

3 Methodology

Dijkstra's algorithm was chosen for single-source shortest path computation on graphs with non-negative edge weights, following the implementation presented in CLRS.¹

4 Results

An exemplary figure is shown in Figure 1. Any time a figure is used, it must have a caption and be directly referred to and discussed in the text.

Figure 1: Dijkstra's algorithm does not work on graphs with negative edge weights, as evidenced here.

5 Conclusion

Summarize results, implications, and possible future work.
